

Enhanced Interface Helps Suppliers With End-to-End Automation for EDI Transactions

MORRIS PLAINS, NJ -- (MARKET WIRE) -- 08/11/2006 -- RedTail Solutions has released an enhanced interface to their hosted EDI

solution to work with the latest release of AccountMate, a popular mid-market accounting software system. RedTail's hosted solution handles all communications between trading partners and manufacturers and distributors using AccountMate through its RTTM (RedTail Transaction Manager).

With the interface created by Figtree Consulting, Inc., the EDI purchase orders are seamlessly moved to AccountMate sales orders. Once the items are shipped, information is passed to the RTTM to generate and transmit the EDI invoice to the trading partner.

The enhanced integration provides a smooth interface which simplifies work for order entry and billing clerks. Clear reporting provides straightforward tools for management oversight.

AccountMate's latest release, version 7.1, includes many new features. The RedTail interface for this release, created for RedTail by Figtree, is now available so that manufacturers and distributors who are currently using, or wish to use, this award-winning accounting and EDI solution can upgrade to the latest versions of both. The Figtree integration can be added to all AccountMate SQL and Express 7.1 versions. No AccountMate source code is required and the interface is provided as part of the RedTail EDI service at no additional charge.

Preparation of the EDI advanced shipping notice is also automated for companies using ACCU-DART software modules and Hand Held Radio Frequency Terminals to transmit shipping information in real time from the warehouse to the accounting system. With the latest RTTM, package level detail information is gathered from the AccountMate and ACCU-DART files and passed to RTTM where it is merged with the EDI purchase orders and used to generate Advanced Shipping Notices.

About AccountMate

Since 1984, AccountMate Software Corporation has provided customers with powerful and flexible accounting and business management software. The availability of source code makes this software highly modifiable so that it can be adapted to any changing business environment. AccountMate accounting modules are available for Microsoft SQL®, Microsoft Express®, and LAN. A wide variety of independently developed programs are also available to further tailor AccountMate software to specific industries. AccountMate products are sold worldwide through authorized resellers. For additional information, visit www.accountmate.com.

About RedTail Solutions, Inc.

RedTail Solutions, Inc. enables suppliers to compete at the highest level in today's supply chain by providing a Software as a Service (SaaS) platform for b2b collaboration through a suite of hosted services via the Internet that can integrate seamlessly with middle-market systems like AccountMate. RedTail's fully integrated and automated electronic collaboration through a single interface, helps suppliers eliminate transaction errors, reduce penalties for non-compliance, and ultimately to streamline business processes. For more information, visit www.RedTailsolutions.com.

About Executive Concepts, Inc.

Executive Concepts, Inc. provides ACCU-DART, a real-time warehouse and inventory management solution including shipping, receiving, physical inventory, and bin transfers. Using radio-frequency scanners, it allows the warehouse staff to instantly update the ERP system. ACCU-DART is available as a complete package, or as individual modules. For more information, visit www.accu-dart.com.

About Figtree
