
An Upsell Management Module of Version 7 for the SQL and Express product lines can associate inventory items with complementary or accessory items, enabling sales people to automatically offer customers upsell items when they are placing an order.

The module includes price and inventory quantity for real-time order information, and a comment feature for scripts or special instructions to provide help during the sales process. Commissions can be tied to upsell items and flagged in the AccountMate accounting system.

Price: Starts at \$1,500. AccountMate: (800) 877-8896.
