

## AccountMate Enterprise 2021 Release 2 Handles Much-Requested Canadian County Tax Support

(Petaluma, CA) (December 20, 2021) David Dierke, President & CEO of AccountMate is pleased to announce that the latest version of **AccountMate Enterprise 2021 Release 2 (R2)** was recently made available for download for clients already experiencing the power of this newest AccountMate product line.

He said, “we continue to release AccountMate Enterprise and Enterprise Express product modules and features based on this latest technology and with adherence to our protocol of rolling out customizable software systems”.

This latest release provides functionality for the Canadian County Tax Support and additional feature enhancements to the already-released modules. To date, the AccountMate Enterprise modules include: System Manager, General Ledger, Accounts Payable, Bank Reconciliation, Consolidated Ledger, Accounts Receivable, Purchase Order, Sales Order, Inventory Control, Inventory Specification, Kitting, Lot Control, Payroll, Price Control, and Manufacturing.

These AccountMate Enterprise 2021 (R2) and AccountMate Enterprise Express 2021 R2 both come with the Report Designer that is included in the System Manager. The intent is to make it extremely convenient and powerful clients or their AccountMate Solution Providers to create customized reports, report layouts, sorting options, and report filter criteria.

The Software Developer Kit (SDK) is available to aid in doing customizations. Source code remains a sellable option for clients.

Based on years of development in the Microsoft .NET environment, this AccountMate Enterprise architecture and updated navigation have been built differently than the AccountMate for SQL, Express and LAN products. Although the screen design is updated and can be different, the process workflow is standard with AccountMate’s other products. This makes learning the product quicker and easier for people upgrading from AccountMate SQL / AccountMate LAN. But the tenant of similar process flow within the AccountMate Enterprise modules is the basis of a consistent long-life software system for AccountMate clients. Inherent in this new product line is the basis for an easy transition from existing AccountMate products to AccountMate Enterprise to fit client requirements. Clients new to AccountMate should also be able to appreciate the uniqueness of this latest AccountMate Enterprise product.

### **About AccountMate**

Founded in 1984, AccountMate develops and markets fully modifiable business accounting software. Systems range from single user versions to those that support hundreds of users simultaneously. AccountMate software is available for local or cloud installation. It is distributed exclusively through a worldwide channel of authorized solution providers.
