

The Latest Release of AccountMate 13.1 Incorporates Avalara AvaTax integration, Credit Card Integration and ClickToPay Enhancements

[Petaluma, CA – August 8th, 2023] - AccountMate Inc. is excited to announce the release of AccountMate 13.1 for SQL and Express, a feature-packed and highly customizable business management and accounting solution specifically designed to cater to the needs of small to medium-sized businesses. Leveraging the power of Microsoft's SQL Server, AccountMate 13.1 ensures scalability, improved performance, and enhanced data security for businesses of all sizes. With two versions available, AccountMate 13.1 offers flexible solutions to accommodate businesses with varying needs.

The release of AccountMate 13.1 marks a significant milestone in providing businesses with a versatile and comprehensive business management and accounting solution. Whether it's managing credit card transactions, automating sales tax calculations, or optimizing banking operations, AccountMate 13.1 has it all.

1. **Express Version** - Perfect for businesses with up to five concurrent users and a database size limit of 10 GB, the Express version provides a cost-effective solution without compromising functionality or performance.
2. **SQL Version** - Designed for companies with up to hundreds of users and larger databases, the SQL version requires the purchase of a full Microsoft SQL Server license and empowers growing businesses with robust capabilities.

Unified User Interface and Customizability - Both versions of AccountMate 13.1 feature the same user-friendly interface, ease of use, and configuration of modules, making it a breeze for users to navigate and adapt the software to their specific requirements. Additionally, both versions are source code modifiable, allowing businesses to tailor the software to their unique needs.

Enhancements in AccountMate 13.1:

Credit Card Integration - AccountMate 13.1 introduces the Credit Card Integration feature in the Accounts Receivable and Sales Order modules, allowing users to pre-authorize, pay, and manage customer credit card transactions seamlessly within the software. With a secure Transport Layer Security (TLS) Internet Protocol (IP) connection, users can process credit card transactions from any workstation without the need for additional equipment or software, saving time and money on processing fees and training. Formally a separate external program, Credit Card Integration is now fully integrated into the AccountMate system.

Sales Tax Integration with Avalara - Expanding on the Sales Tax Integration module, AccountMate 13.1 now offers the option to use Avalara AvaTax or TaxJar. With this integration, the system automatically determines the correct tax rates and amounts for transactions, eliminating the need for manual updates and reducing the risk of costly sales tax calculation errors.

ClickToPay Enhancements - AccountMate 13.1 improves the ClickToPay feature with the ability to set up Net Days for ClickToPay pay codes, disallow the use of ClickToPay pay codes during setup, and allow users to copy a customer's ClickToPay URL for easy access to outstanding invoices and online payments.

Support Attachments in Machine and Labor Maintenance - AccountMate 13.1 now supports attachments in the Machine and Labor Maintenance functions, allowing users to add machine inspection records and other supporting documents for easy reference.

Support for Microsoft SQL Server 2022 - AccountMate 13.1 stays up-to-date with the latest Microsoft technologies and fully supports Microsoft SQL Server 2022.

AccountMate 13.1 Conversion Tools - AccountMate offers a seamless upgrade process with two database conversion downloads, allowing easy transition from previous versions and even competitive products like Sage Pro ERP.
